

One of our favorite people and long time supporter of the magazine is just simply "Buz". We featured Buz on the cover of the magazine way back in Volume 2, Issue 2 on his Victory motorcycle. Since that time, Buz has joined us on numerous runs, helped with fundraisers and invited us in when he was DJ at a local bar's bike night. He's been a long time advertiser and supporter of us and he's just a heck of a nice guy.

So how does someone so nice end up with something bad happening to him? Recently Buz was involved in an accident in his home neighborhood. He ran into a soccer goal that was left out in a public street. Buz was banged up a bit and of course his beautiful Victory was worse for wear too.

After court appearances and all the associated hassles, Buz is still fighting for money for medical bills even though he won a judgment in the case.

But Buz isn't the kind to let things get him down long. Especially when it comes to being able to get out riding! So he started the process of repairing the bike and decided to go one step better.

The sheet metal was treated to loving care and a new paint job by artist **Ben Hagen, of Killer Kustoms**. Ben went from the nice looking flame paint scheme Buz had to a dynamite real flame look. This paint is awesome and so realistic it looks hot just sitting still! Buz then added some killer LED lights by the guys at [MBW Motorcycle Products](#). The guys at MBW specialize in high quality and unique LED lights for Victory motorcycles. The finished result is well worth another spot in the magazine. Just don't burn your fingers!
